by mily make up

How to wear Les Classiques de Mily - simply liners:

4 new styles in every pack

Gently peel off the eyeliner by one of its points.

With your chin up, look at yourself in the mirror and hold both tips with both hands. Place the outer base of the liner as close as possible to the base of the lashes starting at the outer corner of the eye.

Make sure the liner isn't sitting on the lashes pushing them down. In case the liner isn't perfectly placed, just lift it up and readjust it.

Tip: For a heavy lashes look use a few extra strokes of mascara to touch up the skin in the little gaps between the lashes and between the liner and the lashes.

- ♦ Easy to use - just peel off and stick on!
- ♥ no make up remover required - just peel them off!
