- ♦ mily eye flashes use quality materials and adhesives originally developed for medical use
- ♦ mily eye flashes are skin-friendly and anti-allergic
- ♦ mily eye flashes are water-resistant
- ♦ mily eye flashes are easy to use gently peel off and apply!

## How to wear mily eye flashes

4 new styles in every pack

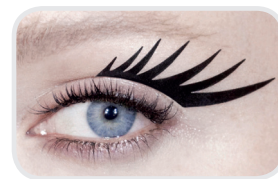

1. Imagine your look.
2. With the eyes open, check the area for your flashes. Make sure the skin is clean: not too greasy and **NO POWDER**.
3. The upper flashes must be placed with the eyes open, with the chin slightly up, on the outer brow-bone area (not the blinking part) of the eye. The base of the flashes will be on the crease.
4. The lower flashes will be placed about 2 millimeters under the bottom lashes on the outer corner of the eye.
5. Carefully and gently peel the flash off the sheet from its base towards the tips.
6. Make sure only the base of the flash sticks to your finger.
7. again, check the area on the outer corner of the eye where you will place the end of the flash base. **BUT** start sticking it on from the inside of the eye area towards the outside. When the base is properly positioned you can then start laying down the tips. Don't worry if you need to remove it and adjust it before finally sticking the little tips down.
8. If you want to create a very dramatic look, after you've put your eye flashes on, you can add an eyeliner, more colours, more eye-shadow, more blush, more glitter and fake eyelashes for the extra glam look.

note 1: if you know you can't live without your usual eyeliner, you can draw your liner first but remember you can always add more to your eye makeup after the flashes are on.

note 2: using just black to cover the entire lid will make you a star!

note 3: the flashes will also look great only on one eye - like in the movie "clockwork orange"

note 4: they look great on guys as well!
